

Focus and Scope

The Journal aims to publish high-quality articles in management, behavioral analytics, and social science research (such as education, business, healthcare, languages, and contemporary management research). Its target audience includes lecturers, students, institution researchers, and independent researchers.

Peer Review Process

At least three expert reviewers review the article in a double-blinded procedure.

3,500- 9,000 words (including references)

Publication Frequency

Advance Knowledge for Executives is an open-access international refereed research journal focused on management, behavioral analytics, and social science research that will be released every three months.

January - March

April - June

July - September

October - December

Since January 2025, Advance Knowledge for Executives' papers have been released every six months (twice a year).

January - June

July - December

The Journal follows a peer review process to ensure the quality of articles before publication. Each published article has been reviewed by at least three experts in a double-blind peer-review process, where the reviewers and authors remain anonymous. Articles submitted by internal authors are evaluated by external experts outside the journal's organization. All reviewers possess expertise in the relevant field and have no conflicts of interest with the authors.

Article Processing Charges

No Article Processing Charges (No APC)

Plagiarism Checking

Plagiarism and AI writing results should be less than 15% using CopyCat, Turnitin, or Grammarly for plagiarism and AI-generated text similarity detection.

COPE (Ethics)

- Editors and reviewers are expected to be aware of and comply with best practices in publication ethics.
- Authors are expected to be aware of and comply with best practices in publication ethics, including authorship (for example, avoidance of ghost or guest authorship), dual submission, attribution, plagiarism, image integrity, figure preparation, and competing interests.
- Authors should be aware of research ethics (human subjects research, animal research, and worldwide research).
- All editors, peer reviewers, and authors should be aware of any potentially competing interests.
